Faruk Hossain Milon

Ex - Software Development Engineer-II at Amazon Web Service
(AWS) | AnyConnect | Samsung | Enosis | Problem setter and Judge
| Competitive Programmer | Programming Instructor
Greater Kuala Lumpur

Summary

A software engineer with 8+ years of experience in engineering and worked on Amazon, Samsung, AnyConnect.

If programming is an art then I am an artist.

Here's my expertise -

- Algorithm and data structures - Expert level
- Java - Spring Boot framework with micro-services architecture
- C++, python - profession level
- iOS - professional level
- Microservice, Monolithic service, NoSQL, MySQL, gRPC, protobuf
- Git, Elasticsearch, Redis, Docker, Database sharding, TableStorage
- Trainer of competitive programming

- 7 th Position in ACM-ICPC Asia Regional Dhaka Site 2015 hosted by North South University.

(Team name: JU_SMS)

- Placed in top 3 three times, top 10 seven times in multiple national programming competition events between 2014-17
- Solved 3000+ programming problems from various online judges.

Experience

PETRONAS Digital Sdn Bhd

Executive (Tech Lead)

April 2024 - Present (2 years 2 months)

Greater Kuala Lumpur

Leading architecture decisions and mentoring developers to ensure low-latency, high-reliability trading data solutions.

Amazon Web Services (AWS)

Software Development Engineer - II

June 2022 - August 2023 (1 year 3 months)

Vancouver, British Columbia, Canada

Project Name: ElastiCache

- * Working in the monitor team to develop and implement automated scaling solutions for nodes, ensuring efficient scaling up or down based on demand and prediction.
- * Coordinating the comprehensive integration testing of the project across global regions, ensuring seamless functionality and performance across diverse geographical locations.
- * Sketched out and implemented app configuration of the project to modify configurations via commands that retains the project from redeployment.
- * Created service's metrics to analyze data for better customer satisfaction
- * Completed about 100 different alarms to predict system failure and automatically resolve issues where possible.
- * Successfully completed the Performance Test project for Droplet's (large node) with concurrent 100K clients and conducted load testing and monitored CPU usage, memory usage, and implemented automatic heat mitigation strategies once the Droplet is hot.
- * Tools & Technologies: Brazil, Spring Boot, S3, DynamoDB, Redis, AWS.

AnyConnect - the Smarter AI™ Camera Platform

Software Engineer

January 2020 - June 2022 (2 years 6 months)

Dhaka

- Working on the server-side of microservices (Report, Repository, Tenant, Geo-location) for providing data during access of camera and dashboard within least possible time
- Implemented 'Report Assistant' service to delete outdated/unnecessary data from database after a specific period of time
- Designed, documented and mastered system test of microservices by python3 language
- Completed system test of 'AnyConnect Access Library' by C++11 language
- Tools: gRPC, maven

- Database: NoSQL (TableStorage), MySQL

Samsung R&D Institute Bangladesh

Software Engineer

February 2018 - January 2020 (2 years)

Dhaka

- Experienced in “iOS Application Development” using Swift language.
- Experience includes
 - o Development of:
 - # Caching data in memory so that it requires less number of request to servers.
 - # Data exchange and processing data among "server <---> Mobile App <---> Watch"
 - # Generating data for demo purpose for the application.
 - # Implementing diagnostic of application
 - # Send app log to server in background to analysis users' data.
 - o Designing efficient algorithms & suitable “Object-Oriented” design for application modules
 - o Writing clean, efficient & maintainable codes under proper design pattern.
 - o “On-site collaboration” with
 - # Samsung Research HQ, Korea
 - For the purpose of R&D of Application Features.
- Experienced in “Samsung Health” android application using Java language.
- Experience includes
 - o Development of:
 - # Working with steps from motion of device
 - # Drawing charts for steps.
 - o Writing clean, efficient & maintainable codes under proper design pattern.

ICPC - International Collegiate Programming Contest

Programming problem setter and Judge

January 2018 - December 2019 (2 years)

Dhaka, Bangladesh

I try to create realistic problem for the programming contest.

Till now I created so many problems for contest.

Contributions:

- External Judge - International Collegiate Programming Contest 2019 (ICPC'19), Dhaka Region
- Setter & Judge - Samsung Inter University Programming Contest 2018
- Judge - Inter Dept Programming Contest - Jahangirnagar University
- Setter - Devskil Programming Contest
- Setter - toph online judge

Enosis Solutions

Software Engineer

August 2017 - February 2018 (7 months)

Dhaka, Bangladesh

- Analysis on existing implementations to understand business logic
- Completed various reports using SSRS.
- Assisted on various modules and bug fixing
- Tools: ASP.NET Core MVC with Entity Framework, SQL Server Reporting Services (SSRS)
- Database: Microsoft SQL Server

Jahangirnagar University

5 years 10 months

Contestant

June 2011 - March 2017 (5 years 10 months)

Savar, Dhaka

From the starting of my university life, I was involved with programming Contest.

I participated in many programming contest in onsite and online and placed most of them.

NCPC 2017 - JU_MSM ----- Place : 3

NCPC 2015 - JU_Warriors ----- Place: 3

BAPSC 2017 - Senior_Junior ----- Place: 2

NCPC 2016 - JU_SleepyHeads - Place: 6

SUB 2016 - JU_SleepyHeads --- Place: 6

ICPC 2015 - JU_SMS ----- Place: 7

SUB 2015 - JU_SMS ----- Place: 7

SUST 2015 - JU_SMS ----- Place 7

Programming Trainer

January 2014 - December 2016 (3 years)

Savar, Dhaka

Trained many students of Jahangirnagar University.

- Trainer on basic C, C++ language for fresh students.
- Algorithm trainer to students so that they can solve problems during programming contest.

Education

Jahangirnagar University

Master's degree, Information Technology · (March 2015 - March 2017)

Jahangirnagar University

Bachelor's degree, Institute Of Information Technology · (January 2011 - February 2014)
